COMPUTER NETWORKS FINAL EXAMINATION (2024/2025) – Moad A -- SOLUTION

Gadi Taubenfeld

Question 1

FDM and TDM – False
In TCP Reno – True
In TCP, in the event of – False
In the DHCP protocol – True
A router will always – False
Using NAT enables – True
Traceroute always returns – False
The question refers – True
A router in the network – True
Assume that the bridge – True

Question 2

Consider a client wanting ➔ 13
Consider the Go-Back-N ➔ 163-170
The question refers to the Ethernet ➔ 1/32
We wish to send a file ➔ 87.5

Question 3

3.1

question	Answer
1	**35 bytes**
2	**200**

3.2

question	Answer (in msec)
1	**6**
2	**10**
3	**30**
4	**21**
5	**13**

3.3

1. The number of edges that become core edges is	**5**	**1.** מספר הקשתות שיהיו קשתות ליבה הוא
2. The level of the fragment is	**2**	**2.** דרגת הקטע היא

Question 4

1. ➔ 52.71.140.0

2. <u>Both</u> the sender and the receiver update their ARP tables when necessary.

<u>-2 points for each mistake</u>

Point	**Number of ARP+IP packets (**write ONE number in each entry).
(1)	**32**
(2)	**16**
(3)	**8**
(4)	**20**
(5)	**4**
(6)	**2**

3. <u>Only</u> the sender updates its ARP tables when necessary.

<u>-2 points for each mistake</u>

Point	**Number of ARP+IP packets (**write ONE number in each entry).
(1)	**48**
(2)	**24**
(3)	**8**
(4)	**30**
(5)	**8**
(6)	**4**
